

Cosmic Wave Program Feedback

Serenity is the wonderful grace that allows us to live calmly in a world that frequently is not calm. Sometimes it is the disturbing forces of nature, often times it is the hurtful behaviors of humankind, that make it clear we do not live in paradise.

The ten unique but clearly connected ensembles of Cosmic Wave create mind and heart rhythms that grace body and soul with serenity. The variety of modes and tempos and sounds moves the imagination to visualize not only cosmic evolution, but also one's own. The feelings of respect, relationship, and reverence gently well up in the listener.

Simply "being", recognizing changes of moments, being comforted by some stability and safeness, yet embracing changes, sensing life is okay, knowing satisfaction and joy – all these pieces of life are carried on the cosmic wave that began an infinity ago and ultimately will end in our home called eternity.

Father Al Merz, OFM

I was invited to attend a program given by John at Jenkins Cumberland Presbyterian Church of Nolensville, Tennessee in September of 2012. This church features new artists in the community by offering a coffee house type setting as a venue for sharing works that inspire faith sharing and relationship building among the participants. John was featured that month and had put together an incredible power point presentation featuring nature in its utmost glory accompanied by a live musical presentation. The medley of pictures and songs is truly inspirational and reflective in nature as to the wonder of God and his majesty. I was so moved that I asked John to perform for our middle school students during Catholic Schools Week last January and he was very well received. The title of the CD is Cosmic Wave and it is a program that truly uplifts and inspires.

Dr. Sue Baumgartner, Principal
St. Edward Catholic School
